PROFESSIONAL SUMMARY

Software Engineer and 2027 CSE undergraduate with hands-on experience building and deploying AI-powered, production-oriented software using AI-native development workflows with Cursor, Claude Code and Codex. Completed multiple engineering internships across AI/ML, voice AI, and IoT, along with 1+ year of open-source contribution involving collaborative development and code reviews. Experienced in taking software from architecture and implementation to testing, debugging, and deployment, with strong skills in Python, C++, Node.js, PostgreSQL, and backend/API development.

EXPERIENCE

Research Intern — IBIoT Lab, MMMUT | Gorakhpur · Hybrid

Jun 2026 – July 2026

- Engineering a scalable, AI-powered fall detection system using IoT sensor streams, machine learning models, and automated real-time analysis for nonintrusive identification of fall events in elderly patients, following Agile practices under Dr. Shwet Ketu, Dept. of CS&E, MMMUT.

AI & ML Engineer Intern — Procand | Remote

March 2026 – May 2026

- Designed and built 6 production-quality AI interview agents using Python and ElevenLabs Voice AI, applying AI-assisted development and automation to streamline structured multi-round interviews end-to-end.
- Engineered STT-based skill extraction, feature processing, and multi-dimensional AI scoring pipelines to generate objective candidate rankings for recruiter dashboards, improving developer and recruiter productivity through intelligent workflows.

AI & ML Virtual Intern — IBM – EduSkills Foundation | Remote

Jun 2025 – Jul 2025

- Built classification and regression pipelines in Python using Scikit-learn, Pandas, and NumPy; applied feature engineering, cross-validation, and model evaluation through iterative experimentation to improve baseline accuracy by ~15%; graduated with distinction in top 5% of cohort.

Open Source Contributor — GirlScript Summer of Code (GSSoC) | Remote

March 2025 – February 2026

- Delivered bug fixes, code improvements, and production-quality features across open-source repositories using Git and GitHub, participating in code reviews and cross-functional collaboration with maintainers; PRs reviewed, merged, and adopted.

COMPETITIONS & HACKATHONS

- 2nd Place — ArtPark ProtoDash, Rhapsody 4.0 @ IISc Bangalore: ranked 2nd of 1,100+ teams nationwide for a production-ready AI prototype evaluated by IISc faculty.
- Top 5 Finalist — Zynd Aickathon National (1,500+ participants): built Zynd-Alpha, a decentralized multi-agent AI swarm prototype for emergency medical dispatch using real-time LLM voice and image analysis.
- Top 50 Finalist — Capgemini Exceller AgentifAI Buildathon 2026, selected among 50,000+ participants and invited to the Capgemini interview process based on performance.

PROJECTS

SynaptiQ ResearchOS — Multi-Agent Research Platform

Python · FastAPI · LangGraph · FAISS · PostgreSQL · Next.js

[synptiq-researchos.vercel.app](#)

- Built a production-grade multi-agent RAG (LLM application) platform using LangGraph to orchestrate research, verification, reasoning, and executive brief generation agents, automating intelligent research workflows.
- Developed claim-level verification with FAISS, Semantic Scholar, and arXiv for citation-backed, hallucination-resistant insights and Knowledge Graph generation.
- Engineered FastAPI REST APIs and deployed on Vercel + Render with PostgreSQL, Redis, and asynchronous processing for scalable, production-quality performance.

SynapSoul Learn Hub — Live Learning Platform (Website + CLI + API)

Node.js · PostgreSQL · React · JWT · GitHub Login | Render + Vercel

[synapsoullearn.runs-on.dev](#)

- Built and shipped a full product — a React website and a Node/PostgreSQL API in production, with login (JWT + GitHub) so the website and CLI share one account; replaced “clone a repo and set it up yourself” with one copy-paste prompt so a student can start learning in minutes; all lessons come from the API (22 modules, 6 skills, 4 tracks), so the tutor cannot make up the syllabus.
- Added a trust and hiring layer plus lightweight ML — Bayesian Knowledge Tracing (BKT) and SM-2 spaced repetition to estimate what a student actually knows and when to review, and a cognitive graph (including PageRank) to surface weak topics; progress is scored on 5 recruiter-style skills (tradeoffs, debugging, security, production thinking, communication) with quoted proof, with hashed admin OTP and usage tracking that never conflates a site visit with actual CLI use.

SwiftShield — AI-Powered Micro-Insurance Platform

Python · FastAPI · WebSockets · Razorpay API · XGBoost

- Built a 7-day hyperlocal disruption risk engine prototype with async WebSocket monitoring, automated Razorpay payouts, and XGBoost fraud scoring with duplicate-submission detection.

TECHNICAL SKILLS

Languages: Python, C++, HTML, CSS, Node.js

ML & Data: Scikit-learn, Pandas, NumPy, TensorFlow, XGBoost, Feature Engineering, Data Preprocessing, Model Evaluation, Cross-Validation, Regression, Classification

Generative AI & LLMs: RAG, NLP, Multi-Agent AI, LangChain, LangGraph, Prompt Engineering, Retrieval Strategies, LLM Fine-tuning, Responsible AI, MCP

AI Developer Tools: ChatGPT, Claude, Cursor AI, Codex, GitHub Copilot

Backend & Data Engineering: FastAPI, Django, REST APIs, JWT, GitHub OAuth, WebSockets, Microservices, Async Programming, PostgreSQL, MongoDB, Supabase, FAISS, Pinecone, ChromaDB

Cloud & Tools: AWS (EC2, S3, RDS, Lambda, VPC), Git, GitHub, Jupyter Notebook, Postman, VS Code, Vercel CI/CD, Render, Playwright, Kali Linux

Frontend, APIs & Networking: React, Vite, Flutter, ElevenLabs, Razorpay, Twilio, Google OAuth, Gemini, Polygon ID, Cisco CCNA, Palo Alto

CS Fundamentals: Data Structures, Object-Oriented Programming, Operating Systems, Database Management Systems (DBMS), Computer Networks

CERTIFICATIONS & TRAINING

Oracle Certified Foundations Associate – Agentic AI Certified Foundations Associate (Oracle University, Jul 2026)

AWS Solutions Architect – Associate (Practice Exam) — AWS (Feb 2026) | AWS Cloud Practitioner (Practice Exam) — AWS (Feb 2026)

CCNA: Introduction to Networks — Cisco (Mar 2026) | CCNA: Switching, Routing & Wireless Essentials — Cisco (May 2026)

CCNA: Enterprise Networking, Security & Automation — Cisco (May 2026) | Network Security Fundamentals — Palo Alto Networks

EDUCATION

G.L. Bajaj Institute of Technology & Management, Delhi NCR (AKTU)

Sep 2023 – Jun 2027

B.Tech — Computer Science & Engineering · 80% till 6th Semester
